| (54) Title: A METHOD AND SYSTEM FOR CONFIRMING THE IDENTITY OF A TARGET CELL FOR HANDOFF (57) Abstract <p>A digital radiocommunication system and method for providing a consistency check to confirm the identity of a candidate cell for handoff of a digital traffic channel are described. Using relative pathloss comparisons reduces reliance on absolute measurements which can lead to inappropriate handoffs for a variety of reasons. Statistical measurements can also be used to further reduce errors.</p> | | |
